

Summer Tasks July 2023

So, you think you would like to study: BTEC Level 3 Applied Science

Summer Task Title/Instructions:

Complete the set work for your next assignment – covering the research required into bacterial and viral disease. You may expand this to include other types of pathogens.

Failure to complete this to the required standard will put you behind in your second year. Missing work or work of a poor quality will require you to attend additional support lessons, before or after school in September.

Your research should be written up with an introduction and clear references.
